

Question 1

Replicate the output below. Limit your declared variables to 5. **DO NOT HARD-CODE** the number of years Steven has been employed at the company. Use %TYPE where applicable.

```
Steven King is the President of the company.  
He was hired on 17/JUN/03 and has been employed for 23 years.
```

Question 2

Write an anonymous PL/SQL block to calculate the total max salary and the department name for department 60 and display the first sentence below.

Initialise the variable for the department ID in the DECLARE section.

Store this amount (max salary), update the department ID variable to 70, run the query again to fetch the second department's details, and conclude by calculating and outputting the second sentence below. **DO NOT HARD-CODE** the salary figures.

```
The wage bill of the IT department is R 50000  
Which is R39500 higher than the wage bill of the Public Relations department.
```
